PROFILE

A Computer Science graduate and an ITI graduate specialised in Full Stack Web Development (MERN Stack). I enjoy building responsive web applications and solving problems through efficient and clean code. My experience with AIESEC strengthened my teamwork and leadership skills. I'm eager to keep learning and contribute to developing modern and user-friendly web solutions.

WORK EXPERIENCE

Web Developer, *Living investment*

Present | Nasr City

- Built and maintained a real estate platform using the MERN stack, enabling property listing management and customer inquiries.
- Developed responsive user interfaces with React.js and Tailwind CSS, ensuring a seamless experience across devices.
- Created backend APIs and managed PostgreSQL databases to support property, user, and content management.
- Implemented a secure admin dashboard with authentication and role-based access control for efficient platform administration.

INTERNSHIP

Full-Stack developer, *Intensive Training Program (ITP)*

ITI, Menofia

- Delivered hands-on training in Full Stack Web Development using the MERN & MEAN stack (React, Angular, Node.js, Express, MongoDB). Guided students through real-world projects, fostering problem-solving, clean coding practices, and teamwork to prepare them for industry-ready development roles

PROJECTS

HagzNow - Sports Court Reservation Platform 🌐,

09/2025 – 01/2026

Tech Stack: React.js, Node.js, Express.js, MySQL, Tailwind CSS

- Collaborated in a team of 5 developers to build a full-stack sports court reservation platform featuring online booking, schedule management, a comprehensive admin dashboard, secure authentication, role-based access control, and responsive user interfaces.

Real Estate CMS Platform 🌐,

03/2026 – Present

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Tailwind CSS

- Designed and developed a real estate CMS that streamlines property management and content updates. Created an admin portal for managing listings, customer inquiries, and platform content, while building responsive user interfaces and secure backend services to support day-to-day business operations.

Arkan Parts Desk – Inventory Management System,

05/2026 – Present

Freelance Project | Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Electron.js

- Built a desktop inventory management application for automotive spare parts, featuring barcode-based stock tracking, product management, and inventory monitoring. Developed responsive interfaces and backend services to support efficient warehouse operations and accurate inventory control.
